## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 27 September 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 1-6 is/are pending in the application.
- 4a) Of the above claim(s) 6 is/are withdrawn from consideration.

Paper No(s)/Mail Date. \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_.

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Newly submitted claim 6 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The claimed subject matter of claimed 6 is directed towards the retaining pin and how it is retained in the hinge via keyed apertures. This subject matter is independent and distinct from the originally presented subject matter.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 6 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4, 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Horton USP 5,921,379. Horton discloses a similar device comprising a(n):

- Plurality of links (fig. 3A) each link containing a top plate (24) having a continuous flat top surface (the flat surface of the top plate extend to include a portion of the upper surface of the hinge)

Art Unit: 3651

- Hinge portion (38-40) provided on said top plate
- Wherein the continuous flat surface portion of engagement portions between adjacent links overlap with each other [see top view of conveyor in fig. 1 & 3A which show that the continuous flat surface (24 and including a portion of the upper surface of the hinge) between adjacent links overlap with each other]
- Curved conveying section (fig. 3A; C3/L41)
- Pin (26) defining a central axis
- Front and rear hinge portions (34 & 38-40)

#### ***Allowable Subject Matter***

3. Claims 2, 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

4. Applicant's arguments filed 9-27-04 have been fully considered but they are not persuasive.

The applicant argues that Horton does not disclose overlapping of the continuous flat surface portions. In response the examiner notes fig. 1 & 3A of Horton that show overlapping of the continuous flat surface portions (24 and including a portion of the upper surface of the hinge).

Art Unit: 3651

Additionally, the applicant argues that Horton does not disclose a central axis. In response the examiner argues that this recitation in the claim, as it fails to provide a frame of reference, thus renders the recitation extremely broad. Horton discloses at least one central axis e.g. the pin alone has a central axis running radially along its length.

### ***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
